DETAILED ACTION

The following is an examiner's statement of reasons for allowance: Re claims 1, 11 and 22 the limitations of "the minus heatsink plate and the plus heatsink plate forming a two-story structure in an axial direction ... and the rear cover includes a plurality of radial openings that are open in a radial direction of the rotor and positioned radially outside of the cooling fins, so that cooling air is introduced from the radial openings," emphasis added, in combination with the remaining claimed structure is neither found nor fairly suggested in the prior art or any combination thereof. Re claim 29 the limitations of "the minus heatsink plate and the plus heatsink plate forming a two-story structure in an axial direction" and "the first (505) and the second cooling fins (507) are positioned to face the radial openings (802, 804) of the rear cover, and the radial openings (802, 804) of the rear cover positioned radially outside of the first and second cooling fins," numerals added as shown in figure 9, in combination with the remaining claimed structure is neither found nor fairly suggested in the prior art or any combination thereof. Furthermore, the Aeschlimann reference is not prior because the WIPO publication, of which Aeschlimann US 2003/0178899 is in the national stage was in French, not in English thus does not receive a 102(e) date. Hence, the 103 rejections using this reference have been withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably Art Unit: 2834

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David W. Scheuermann whose telephone number is (571) 272-2035. The examiner can normally be reached on Monday through Friday from 8:00 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Darren Schuberg can be reached at (571) 272-2044. The fax phone numbers for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
